## LETTER OF RECOMMENDATION

I am writing recommendation letter for Jaskaran Singh. He stayed in contact with me for his whole four year Aeronautical degree (B.Tech) and still talks with me about his future. According to my view, I would rank him as one of the best student I ever seen in my life, as he was very polite, dedicated, attentive, calm and rule abiding student.

During his course time, I was in charge of propulsion Lab. I observed that he was really curious student who want to understand the concepts of each and every instruments or machine parts available in the lab. Not just that, He has a keen interest in making practical objects.

Moreover, I was appointed to teach Aircraft Propulsion subject in his class. In that period of time, I was able to observe him both in theoretical study and aptitude. He always performed very well in class monthly tests because he firstly understand the basic concept of topic and then move towards difficult level of that topic. His that approach, critical thinking and problem solving skills showed his aptitude level.

Through his way of talking about his carrier goals, I have evaluated him as a confident, energetic, positive, and very serious about their carrier to meet his dream successful. Furthermore, He has great will power which strength him to confront all struggle to achieve whatever he want. From my heart, I strongly recommend him for master program at your institute. I will say best of Luck for his future and God bless him.

Yours sincerely,

  
Er. Amit Singh Tanwar

## LETTER OF RECOMMENDATION

I am pleased to provide reference for Jaskaran Singh to whom I started giving lecture on Aircraft structure, Aero elasticity to his class, during last year of his undergraduate course. Before, I knew him very well because he was very well known in the institute as he had participated in extra curriculum activities such as sports and cultural programs, and stayed in lime light.

The qualities which I observed in Jaskaran were that he is very smart, great personality, hard working with smartness, intelligent, ambitious student. During lecture period, he put forward questions which only that student could ask who know the topic already. I came to know from him that he himself studied the prospective topic so that it becomes easy to understand particular topic while attending lecture in class. It shows how much he took interest and eager to learn something very seriously.

Moreover, he completes his assignments and projects on time and every time comes with an innovative idea. Theoretically, I give him excellent in mathematics as he easily solved the structure numerical problems. I found him as in charge whether project relating groups or which shows great leadership qualities.

He told to me many time that he will definitely go for higher study in a renowned university or institute. The desires, curiosity to learn, confidence level, and achieve something in engineering line is allowing him to do masters. From my side, I will definitely recommend this student for higher study as has the capabilities for that and wish him good luck for his future endeavor.

Yours sincerely,

  
Er. Abhineet Thakur
